

Quick.

Flexible.

Perfect

REX Programme

Electronics

Housing

Construction and Precision for Special Applications.

Setting Standards:

Sensitive electronics components need housing solutions with a protective function. The stainless steel housings from the REX programme convince with a multi-part structure with a swivelling middle part. All REX housings are extremely stable. STEELDESIGN is the leading provider in stainless steel housing construction and holds many patents, in particular in sealing technology. Quality is our standard. We are certified and meet the highest safety and test criteria for all areas of application nationally and internationally. The REX stainless steel housing thus also is a perfect solution. Experience makes the difference.

Construction: Stainless steel 19" -Housing with swivelling middle part, front door with inserted sight glass of 6 mm safety glass

Middle part: 180 mm or 210 mm deep, with profiles to take up 19" - installation parts

Wall part: With 4 attachment bores 10.5 mm-Ø and assembly plate for zinc-plated stainless steel

REX stainless steel housing for sensitive electronics components - all installations are securely protected from dust and contact.

1 Swivelling middle part for easier assembly and easier installation of electronics components

2 Middle part in different designs available with profiles to hold 19" installations

3 Front door with sight glass of safety glass 6 mm

Material: Stainless steel 1.5 mm, standard 1.4301, 1.4404 and 1.4571, polished, grain size 240, or 320, satinated, electropolished, or Cleanüne

Protection Classes: IP65

Grounding purs. to VDE 0660: Body, door

Hole patterns REX: Electronics housings are delivered without hole pattern, delivery with desired hole pattern against surcharge

accessories: Grounding set, wall tabs on request

Construction principle

Glass holder, all around

3 REX hinges

Reinforcement 10 x 10
